Pads

# About us

**R-Attack®** è un marchio italiano che nasce dall'esperienza di Motorquality maturata in cinquant'anni di attività nel motorsport attraverso partnership commerciali e tecniche con i marchi più prestigiosi nel panorama Moto e Auto.
La grande esperienza maturata sui campi di gara con i materiali d'attrito ha portato Motorquality a sviluppare una propria gamma di prodotti.
L'intero processo di sviluppo, affidato ad un team esperto di ingegneri, utilizza metodologie avanzate come la modellazione CAD 2D/3D e l'Analisi agli Elementi Finiti (FEM).
La validazione dei materiali d'attrito avviene internamente grazie alla presenza di un laboratorio di ultima generazione corredato di banchi dinamometrici per il testing e la caratterizzazione dei sistemi frenanti.
Questi banchi prova sono in grado di riprodurre il comportamento del veicolo in una serie infinita di scenari, dalla simulazione su circuito specifico fino ai cicli tipici dell'utilizzo in ambiente urbano.
Questo metodo di lavoro serve a garantire che, oltre al parere dei tester, ci siano anche dei dati certi e precisi relativi ai parametri critici come efficienza, stabilità e durata di una particolare mescola.
Per questo motivo, la gamma **R-Attack®** è composta da pastiglie affidabili e performanti adatte alle necessità di guida e di utilizzo di tutti i motociclisti.
Le pastiglie **R-Attack®** rispettano gli standard internazionali di qualità, ambiente e sicurezza del settore e rispondono ai requisiti di legge dell'Unione Europea attraverso l'omologazione ECE R90.

R-Attack® *is an Italian brand distributed by Motorquality, a company boasting fifty years of experience in the racing world. Our core business consists of the distribution of premium brands and the development and production of high-performance braking system components and friction materials.*
*The entire range of these brake pads is engineered and designed exclusively in Italy by a team of highly qualified engineers.*
R-Attack® *strictly adheres to all quality regulations and the most prominent industry certifications. The development and validation of friction materials are crucially supported by the Engineering Laboratory integrated within the Motorquality facility.*
*This division is at the forefront of using advanced methodologies, including 2D/3D CAD modeling and Finite Element Analysis (FEA). A key element of the R&D process is the use of two inertial dynamometers for the testing and characterization of braking systems.*
*These test benches can reproduce vehicle behaviour across an infinite range of scenarios, from specific track simulations to typical urban environment cycles. This workflow ensures that, alongside tester feedback, there are certain and precise data regarding critical parameters such as efficiency, stability, and durability of a specific compound.*
*As a result, the* R-Attack® *range consists of reliable, high-performance pads tailored to the riding needs of all motorcyclists.*

# Friction Materials

## MESCOLE STREET

### Mescola SM (Sinterizzata)

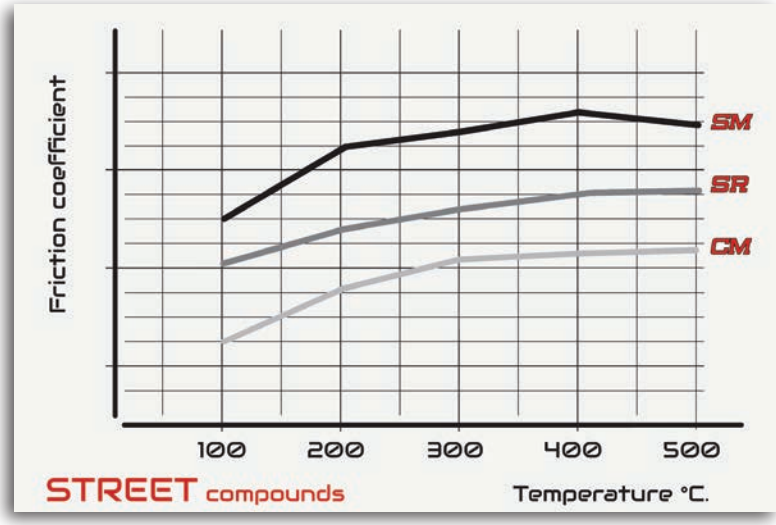

La Mescola SM è un materiale di alta qualità progettata specificamente per le esigenze delle applicazioni sui freni anteriori delle motociclette stradali. Questa pastiglia è stata studiata per offrire una frenata molto potente e per far sentire bene al pilota quanta forza sta usando sulla leva.
Questa mescola offre efficienza e stabilità molto elevate, in tutte le condizioni di guida, oltre ad offrire una buonissima durata kilometrica.
L'usura ridotta, infatti, la rende una scelta ideale per i motociclisti che cercano prestazioni di lunga durata senza compromessi sulla sicurezza e l'affidabilità.

### Mescola SR (Sinterizzata)

La Mescola SR è una mescola sinterizzata appositamente sviluppata per l'uso sulle pinze freno posteriori: offre infatti un equilibrio ottimale tra modulabilità e stabilità, caratteristiche ideali per il controllo e la stabilità del veicolo, oltre a resistere ottimamente al fading anche sotto stress termico elevato. La sua affidabilità in un ampio range di temperature la rende quindi una scelta versatile e sicura per il freno posteriore.

### Mescola CM (Carbon-Ceramica)

La Mescola CM rappresenta una soluzione avanzata nel campo dei materiali di attrito Carbon-Ceramici.
Si distingue per l'impiego di elevate quantità di carbonio nella sua formulazione, un elemento chiave che ne potenzia significativamente le prestazioni rispetto alle mescole Carbon-Ceramiche standard. Questo materiale offre un'elevata durata e un'usura molto contenuta, rendendolo vantaggioso nel lungo periodo. Le sue prestazioni sono costanti e affidabili sia a caldo che a freddo, garantendo una risposta pronta e sicura

## MESCOLE SCOOTER

### Mescola SS (Sinterizzata)

La Mescola SS è una mescola sinterizzata progettata per garantire efficienza ai sistemi frenanti degli scooter, adatta sia per le applicazioni anteriori sia per le posteriori. Questo materiale fornisce la corretta stabilità termica operativa, una caratteristica fondamentale per l'uso frequente e intensivo nel traffico urbano.
La SS garantisce quindi prestazioni costanti e prevedibili in tutte le situazioni di guida, assicurando spazi di arresto ridotti e una grande affidabilità.

### Mescola CS (Carbon-Ceramica)

La Mescola CS è un materiale di attrito di natura Carbon-Ceramica sviluppato come soluzione universale per la vasta gamma di scooter presenti sul mercato.
La sua progettazione mira a bilanciare l'efficienza frenante e la durata, fornendo buone prestazioni in tutte le condizioni d'uso quotidiano.
Il suo punto di forza è l'offerta di un chilometraggio adeguato, garantendo un buon rapporto qualità-prezzo e riducendo la necessità di sostituzioni frequenti per l'utente medio dello scooter.

## STREET COMPOUNDS

### SM Compound (Sintered)

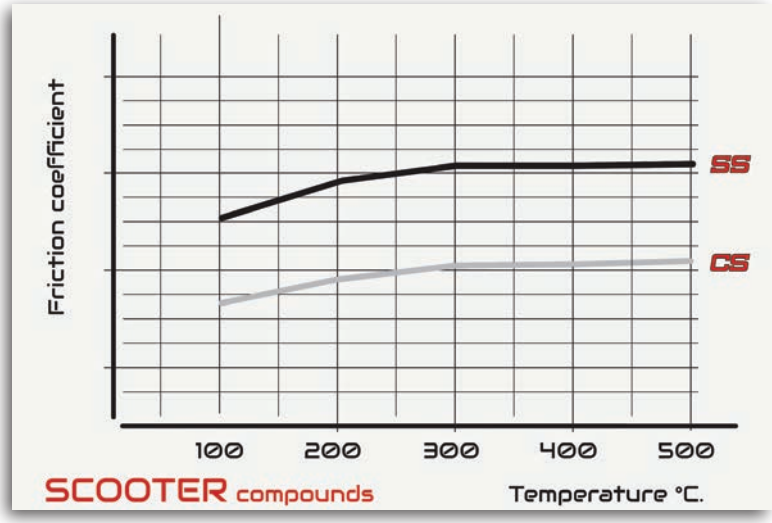

*The SM Compound is a high-quality material specifically designed for front brake applications on street motorcycles. This pad has been engineered to offer powerful braking and superior lever feel, allowing t he rider to modulate pressure accurately. This compound provides very high efficiency and stability in all riding conditions, along with excellent mileage durability. Its low wear rate makes it the ideal choice for riders seeking long-lasting performance without compromising safety or reliability.*

### SR Compound (Sintered)

*The SR Compound is a sintered material specifically developed for rear brake calipers. It offers an optimal balance between modularity and stability—essential features for vehicle control—while providing excellent resistance to fading even under high thermal stress. Its reliability across a wide temperature range makes it a versatile and safe choice for the rear brake.*

### CM Compound (Carbon-Ceramic)

*The CM Compound represents an advanced solution in the field of Carbon-Ceramic friction materials. It stands out for the high carbon content in its formulation, a key element that significantly enhances performance compared to standard carbon-ceramic compounds. This material offers high durability and very low wear, making it advantageous in the long term. Its performance is consistent and reliable both when hot and cold, ensuring a prompt and secure response.*

## SCOOTER COMPOUNDS

### SS Compound (Sintered)

*The SS Compound is a sintered material designed to ensure efficiency for scooter braking systems, suitable for both front and rear applications. This material provides the correct operational thermal stability, a fundamental requirement for frequent and intensive use in urban traffic. The SS ensures consistent and predictable performance in all riding situations, guaranteeing short stopping distances and great reliability.*

### CS Compound (Carbon-Ceramic)

*The CS Compound is a Carbon-Ceramic friction material developed as a universal solution for the wide range of scooters on the market. Its design aims to balance braking efficiency and durability, providing good performance in all daily use conditions. Its strength lies in offering adequate mileage, ensuring a good quality-price ratio and reducing the need for frequent replacements for the average scooter user.*
